SUMMARY

Results-driven IT graduate with hands-on experience in **Level 1 technical support**, **incident response** and **customer-facing troubleshooting**. Proven ability to diagnose, **troubleshoot and repair hardware and software issues** while maintaining a high level of customer service. Skilled in resolving support tickets within SLAs, documenting resolutions and escalating complex problems to ensure efficient, high-quality support in fast-paced environments. Available for 3-shift rotation including night shifts, weekends, and public holidays.

EDUCATION

Bachelor's Degree in Computer Science with Maritime Informatics (Honours), Universiti Malaysia Terengganu (UMT)

Diploma in Computer Science, Kolej Professional MARA Beranang

Sijil Menengah Agama (SMA), Sekolah Agama Menengah Bandar Baru Salak Tinggi

CERTIFICATIONS

CompTIA Security+ (In-Progress)

SKILLS

Technical Skills: First-Line Support, Incident Logging & Ticketing, Hardware & Software Troubleshooting, Windows OS, Microsoft 365, Active Directory, Networking & Network Troubleshooting, SLA Management, Remote Support, User Account Setup, Access Issues, Password Resets, Printer & Peripheral Support.

Tools: Microsoft Suite (Word, Excel, PowerPoint), Kali Linux, VirtualBox, QEMU/KVM, Metasploit, BurpSuite, Nmap, Wireshark, pfSense, Python, Django, MySQL, HTML, CSS.

Languages: Malay, English

WORK EXPERIENCE

Pusat Ekosistem Digital, IT Security & Support Intern | Jan 2026 - Jun 2026

- Logged and tracked 15+ system vulnerabilities in ticketing systems, mitigating 40% of potential data exposure risks.
- Authored 5 incident response playbooks, accelerating issue escalation to Level 2/3 specialized teams.
- Standardized vulnerability documentation, boosting reporting consistency by 25% and cutting patch time from 14 to 10 days.
- Installed Windows OS and Microsoft 365 on desktops and laptops, supporting Active Directory access.

VASE.AI, Python Programming Intern | Oct 2020 - Dec 2020

- Completed all practical projects in "Automate the Boring Stuff with Python" under direct supervisor review.
- Automated repetitive tasks using Python loops, functions, and file handling, building foundational scripting skills.
- Debugged and troubleshot 15+ coding exercises independently, sharpening problem-solving skills.
- Developed self-learning discipline by independently completing all assigned exercises within a 3-month internship.

Penang Food Fantasy (PFF), Customer Service & Operations Specialist | Jan 2014 - Dec 2019

- Resolved 50+ customer issues per 12-hour peak shift, maintaining a 98% satisfaction rating through calm problem-solving.
- Performed real-time hardware and software troubleshooting on POS systems, achieving 100% uptime during peak hours.
- Performed basic repair and hardware replacement on PCs and POS terminals, including RAM and storage upgrades.
- Trained new staff on POS operations and basic troubleshooting, reducing common-error incidents by 30%.

PROJECTS

SUKSIS Evaluation Management System, Full-Stack Developer (Final Year Project) | Jan 2025 - Dec 2025

- Designed a full-stack Django/SQL app automating assessment tracking for 200+ students, cutting data entry errors by 30%.
- Engineered automated calculation algorithms and validation logic, reducing result processing from 5 days to 3 days.
- Trained 15 non-technical staff with user guides, achieving 99.9% adoption and zero post-launch support tickets.
- Built a user-friendly interface with clear error messaging, improving user experience and reducing direct support needs.
